

To : Chiefs of Field Bureaus

14 July 1948

From : Chief, FBIB

Subject: Point-to-point administrative messages.

1. It is desired that FBIB Field Bureaus devote no effort to the interception of private, commercial or governmental messages (as opposed to press material) transmitted on point-to-point circuits, and that teletype files from Field Bureaus include no such messages.

2. If, in the course of monitoring press material, unrelated administrative messages should be intercepted on circuits or at hours normally devoted to press, textual transcriptions are to be airmailed to this office under "confidential" classification, together with notation of hour, frequency and other circumstances of interception.
